

Sampling at Highway 3 Bridge

Region 10

October 2021

In early November, sampling will take place at a beach area near the Highway 3 bridge. The bridge spans the Coeur d'Alene River, about two miles downstream from the town of Rose Lake. The Coeur d'Alene Trust will perform the work, directed by the U.S. Environmental Protection Agency.

Two to three days of sampling will take place 7:00 a.m. to 7:00 p.m., Monday through Friday. EPA will work closely with the Coeur d'Alene Trust to incorporate up-to-date guidance on reducing the risk of contracting COVID-19 during site work.
